

THE Gleichen Call

TWENTY-SEVENTH YEAR NO. 18

GLEICHEN, ALBERTA, WEDNESDAY JULY 19, 1933

SUBSCRIPTION \$2.00 PER YEAR

REGULAR SESSION OF TOWN COUNCIL HELD

A regular meeting of the Town Council was held with Mayor Yates presiding and Councillors MacCallum, McConnell, MacDonald, McKay and W. Thompson present.

An application had been received from F. Max to buy the blue house and barn in the west end of the town. K. H. McPhee was also interested in this and put in a bid for the property. As the bids were too low the councillors decided to turn down the offers.

C. Fluehr was present and asked to exchange his lot and a half for three lots south of W. Read's residence as he wished to make a residence there. The town fathers were agreeable and handed over the lots.

The next question to come up was one open to the public. The Post Office Hotel. Mr. Murray stated that he had received a letter from the Attorney General which stated that the town would be liable for any accident caused by somebody tampering with the chain. The town thought great care and it was decided to put up a woven wire fence all around the open basement. Some of the councilors remanded that there was some good woven wire around the Agricultural grounds and it would be just the thing put up. The secretary was instructed to interview the Agricultural Association officials about the purchase of this wire and see if a deal could not be made. Mr. Watson gets the wire the public works department will set to work and have the fence erected within a day.

The question of staining flowers from the graves at the cemetery was discussed at length, also the water of irrigating the cemetery was brought up. One councillor stated that the grass was brown and the man who bought it might be possible to burn it off. The entire matter was laid over until the next meeting and in the meantime the secretary will look into this.

The matter of the trees that were up立 in front of the Peace River property was discussed at length. It was agreed that if the trees were moved just now they would die. Vern Sanders had left Mr. Murray that if the trees were left till spring he would remove them.

Mayor Yates and Councillor MacCallum had been delegated to the convention of municipalities. They outlined what had taken place. A full report of the meeting would be received later from the secretary of the association.

Members of the council had been told that the new town office had been established around the trees to the chagrin of some citizens but so far no damage had been done. W. Varnell had watered all the trees in town once since the last meeting. The town handy man also spent a lot of time watering them. The weather made many demands on the water supply.

Some members had called at the secretary's office and made application to take advantage of the Tax Consolidation Act.

The zoning by-law was discussed in the regular session. The by-law is to be submitted to the question of consolidating the by-law so as to have some stations properly approved.

A letter has been received from the solicitor for the City of Calgary regarding the payment of the hospital account of Mrs. J. Irvin. The town takes the attitude that the Peoples' Hospital should pay this.

It was brought out that some of the citizens were allowing the irrigation water to run to waste, which meant a lot of extra pumping and increased expenses. A by-law is to be prepared governing the use of, and the storage of water for irrigation purposes, with penalties for infractions of the by-law.

After the passing of the accounts paid since last meeting the council adjourned.

The following accounts paid since the last meeting were confirmed as paid: British American Oil \$1.05; Gleichen school district \$1.650; A. McKenzie \$4.50; Postmaster \$16; W.

FORTNIGHTLY CROP REPORT NOT VERY FAVORABLE

The general crop situation in southern Alberta has not improved during the past two weeks. Scattered showers have occurred in the southern part of the province but these have not been sufficient to overcome drought and insect damage previously reported. In some of these areas, particularly in that lying between the Corralton area and of Crowsnest Pass, the river crop conditions may be regarded as serious, in the indicated districts fairly satisfactory conditions prevail but on the dry land especially on poor plowing there has been severe crop damage due to both dry winds and lack of moisture. In the area just to the southern boundary from Milk River through to Fernie and Manyberries there has been considerable moisture throughout the season so that the crop in this district is in fair condition. The situation in the vicinity of the timber south of Cardston and Crossfield has not received sufficient moisture and as a result there will be a short crop. Throughout north central and northern Alberta, reports indicate satisfactory moisture conditions although more occurs over all this area, in some instances amounting to more than two inches of precipitation during the past two weeks.

Reports indicate that the damage from grasshoppers and other pests has not been as bad as in the year previous where infestation has been most severe and winter wheat conditions have greatly retarded crop growth, grasshoppers have caused further deterioration. Small hills have damaged crops in a few small areas but it is generally considered that the estimated moisture has more than offset the damage due to this cause.

The greater part of the wheat crop, with the exception of that in the Peace River district, is now in head. In the latter district harvesting has commenced and is progressing under favorable conditions. Oats and barley are in the shot stage.

Hay is in progress in practically every part of the province. All of the first cut alfalfa on the irrigated lands is already in the stack and harvesting of the second crop is taking place. In central and northern Alberta, the first cutting of winter hay crops are being cut. These will be a market shortage of hay in the southern and east-central areas but conditions with regard to this crop are most satisfactory in the northern half of the province.

Unless rains relieve the situation within the next few days there will be distinct shortage and feed shortage in those districts where drought has been most severe.

The sugar beet crop on the irrigated lands of the south is making satisfactory progress and gives indications of average yield.

COMMUNITY PROGRESS

While Gleichen has much to boast of as it considers past achievements, it must be shamed fully at the state of its community development, to rest content with past laurels and cease striving for further advancement.

Gleichen's present high standing among centers of equal population has been attained by foresighted progressive policies in the past. This generation should be just as eager to assure an enviable future for the community as were those men of former generations who often fought a stiff hill fight to gain those things upon which the town's present prosperity rests.

Never before in its history has Gleichen been in such good position to go forward in rapid and substantial development as right now. It has all its pristine attractions plus many

Sky Line Hiking in the Rockies

Organized trail hikes in the Canadian Rockies has not improved during the past two weeks. Scattered showers have occurred in the southern part of the province but these have not been sufficient to overcome drought and insect damage previously reported. In some of these areas, particularly in that lying between the Corralton area and of Crowsnest Pass, the river crop conditions may be regarded as serious, in the indicated districts fairly satisfactory conditions prevail but on the dry land especially on poor plowing there has been severe crop damage due to both dry winds and lack of moisture. In the area just to the southern boundary from Milk River through to Fernie and Manyberries there has been considerable moisture throughout the season so that the crop in this district is in fair condition. The situation in the vicinity of the timber south of Cardston and Crossfield has not received sufficient moisture and as a result there will be a short crop. Throughout north central and northern Alberta, reports indicate satisfactory moisture conditions although more occurs over all this area, in some instances amounting to more than two inches of precipitation during the past two weeks.

Reports indicate that the damage from grasshoppers and other pests has not been as bad as in the year previous where infestation has been most severe and winter wheat conditions have greatly retarded crop growth, grasshoppers have caused further deterioration. Small hills have damaged crops in a few small areas but it is generally considered that the estimated moisture has more than offset the damage due to this cause.

The greater part of the wheat crop, with the exception of that in the Peace River district, is now in head. In the latter district harvesting has commenced and is progressing under favorable conditions. Oats and barley are in the shot stage.

Hay is in progress in practically every part of the province. All of the first cut alfalfa on the irrigated lands is already in the stack and harvesting of the second crop is taking place. In central and northern Alberta, the first cutting of winter hay crops are being cut. These will be a market shortage of hay in the southern and east-central areas but conditions with regard to this crop are most satisfactory in the northern half of the province.

Unless rains relieve the situation within the next few days there will be distinct shortage and feed shortage in those districts where drought has been most severe.

The sugar beet crop on the irrigated lands of the south is making satisfactory progress and gives indications of average yield.

THE GREAT DROUGHT OF 1885

That this is an exceptionally dry year all over the province is admitted and the prospect of a crop is mighty slim, The Hanna Herald speaking of the drought in 1885 gave David Breerton, who died in 1919, and was for many years a resident of Gleichen and district, authority for the drought of that year. The item in the Herald is as follows:

"Although it is impossible to secure details of the various crops sown extending back beyond the year 1880, citizens who had come into the district previous to that year had down to inter arrivals a general out line of conditions dating back as far as 1885. For instance, one of the earliest reliable accounts of the state of the Bow River is to be found in Breerton one time residence of Gleichen. The Herald is informed by an old timer of the Hand Hills district who located there in 1888, that Breerton informed him that in 1885 this country suffered from a severe drought. From Breerton's story, it would appear that the prolonged dry spell of 1885 is therefore the worst since that year. The Herald's informant points out that 1885 was succeeded by a hard winter, which is taken as a positive indication of what followed. From Breerton's story, it would appear that the winter of 1886-87, 1888-89, 1890-91, 1892-93 and 1894-95 were the severest winters known to date. It would be of interest to note that the winters of 1890-91, 1891-92, 1892-93 and 1894-95 were recorded as hard winters with a blizzard setting in on October 2nd, 1891 and severe winter weather curving on from that date."

Bon McLeod made a trip to London by tractor Sunday, a distance of 70 miles. On Monday he returned to England for a three months holiday, accompanied by his wife.

James Cameron, the local manager of the Bank of Commerce, has left for England for a three months holiday, accompanied by his wife.

CONSOLIDATED TAX ACT NOW IN FORCE HERE

It was decided at the meeting of the Town Council that the provisions of the Local Tax Act Consolidation Act would be put into force as applied to the town.

This is a very important piece of legislation and concerns the ratification of the act and making it a law.

The act provides for the payment of arrears in annual installments over a period of six years together with payment of current taxes. It is a condition of the understanding that the current year's tax will be paid in full.

Payments must be made on or before December 15th. The first payment is due December 15, 1933, and amounts to 10 per cent of arrears; the second payment is 10 per cent; the third 15 per cent; the fourth and fifth 20 per cent and the sixth 25 per cent.

Substantial discounts are allowed on balance of arrears when payment is made, the scale of discounts varying according to the number of years the arrears extend beyond the year 1930. The act has the effect of wiping out the penalties which were added for non-payment of taxes.

Operation of this new legislation is of immediate interest to local rate-payers, who are in arrears. It protects them with a means of keeping their tax arrears in good standing and at the same time pay off their arrears.

Mr. and Mrs. J. Irvin have moved from the D. Hutchison house and are now occupying the residence of J. Moen.

ECHOES OF GLEICHEN TWENTY YEARS AGO

Only two motions were made and carried at the meeting of the Gleichen town council. One of them was the raising of the speed limit to 25 miles an hour and the other the passing of the accounts. Several of the councillors gave a brief account of their oratory ability.

John MacLeod, the local manager of the Bank of Commerce, has left for England for a three months holiday, accompanied by his wife.

Calgary Dry Ginger Ale

THE GLEICHEN CALL, GLEICHEN, ALBERTA

HER HAND FELT DEAD

Helpless With Rheumatism

At one time she thought she would lose the use of her right hand. But a simple poultice of Kruschen Salts—put her right again.

"I was sure in a bad state and she withered away. I had to do all my housework. I was so bad with rheumatism in my arms and hands. I could not sleep at night and had to get up and heat water to ease my pain and numbness. I took all kinds of medicines, but it was still worse. I thought I would lose the use of my right hand. I could not hold anything. I could not even hold a pen. My arm would go dead. I was advised to try Kruschen, and inside of three weeks I had such a change. I have kept on taking Kruschen ever since for the blessings I have received in Kruschen. Now I sleep all night—thank you, Kruschen, help and relief!"—(Mrs.) J. H.

The six salts of Kruschen stimulate the liver and kidneys to remove regular acids; assist them to get rid of the excess uric acid which is the cause of all rheumatism, swelling. When you take Kruschen, along with its deposits of needle-pointed crystals—there's no doubt about those aches and pains going too!

Authorities Have Real Worry

What To Do With Doukhobors When Released Is Question

Authorities in British Columbia responsible for the wholesale imprisonment of more than 600 Doukhobors as a result of seditious parades and similar demonstrations last year are beginning to consider the problem of what to do with the refugees when they are released from their penal colony on Piers Island.

In most cases the Doukhobors will return to their former homes to find that their lands have passed to other hands. In some cases their fields will either be converted into wheat or will be under the control of others. What address will they have, if any?

Fropical officials are wondering whether the problem caused by this situation will not be as difficult as to find the original ones. They have no place hope to go. Most Doukhobors who were separately cared for at industrial homes and who have been gradually returned to Doukhobor families who pledged themselves to subscribe to Canadian laws, but they are not so sanguine about the future of the original ones. They realize that the native members of the fanatical sons of freedom band are not likely to show a different attitude when they are liberated.

Describing the general attitude of the Doukhobors, Judge Forin, who has made a study of the subject, pointed out that the members of the cult, though originally anti-social, had become law-abiding citizens. "The Doukhobors' attitude in a way that is really remarkable when they sought entry into Canada," he said.

"The cumulative effect of them having adopted doctrines of various religions is that they have no places of worship, no schools, no clinics, no clinics, refuse to buy or accept money, their leaders divine and cling to the dangerous doctrine that they have a secret and mysterious knowledge in no way accessible to outsiders."

Judge Forin described their leaders as having "brilliant executive minds." "It is a bit of a contradiction that we have to work hard and contribute, refuse to buy or accept money, their leaders divine and cling to the dangerous doctrine that they have a secret and mysterious knowledge in no way accessible to outsiders."

In tracing the early history of the Doukhobors and the many religious reforms they have undergone, Judge Forin stated that his researches had been applied to the sermons as made by Leo Tolstoy was adopted by the late Peter Verigin as teachings of Tolstoy.

A Lengthy Law Suit
A lawsuit which lasted 900 years has been settled in this court of appeal. It is to continue to the next term, when two Italian purchases, Casalieri and Vicalvi, both laid claim. Neither would budge in its stand until recently, when a compromise was effected.

NERVOUS WOMEN

Take Lydia E. Pinkham's Vegetable Compound

"I am so nervous it seems as though I am going crazy. 'If I wish I were dead,' I say. 'I am so tired all the time.' I have suffered from some who have become hysterical. I am not hysterical, but I am no longer afraid of the straitjacket."

"I don't know what I shall have to do to get out of this condition. If you can help me, I will be grateful. I have tried Dr. Henry's Vegetable Compound in trial. For some time now I have been taking it and it is wonderful tonic to give them a renewed energy."

"Not out of every 100 women who report to Dr. Henry's Vegetable Compound, 99 take a bottle from your drugstore today . . . and wish that she could."

W. N. U. 1968

Low Wheat Prices

Future Recovery Of Grain Prices Uncertain Factor

No silver lining to the low price cloud which has blighted wheat growers for the past five years could be seen by Dr. Holbrook Working, international wheat expert, Stanford University, when he read a paper on the future of grain prices to the agriculture section of the Pacific Science Congress.

He cited three factors which are preventing recovery of world wheat prices:

1. The surplus which has depressed world wheat prices for the record crop of 1928, still exists.

2. World acreage at present is adequate to supply needs.

3. There is no incentive to restrict acreage in Europe due to artificial aids to prices sponsored by government.

Where an abnormally large crop is not followed by an equally abnormal one, restrictions of acreage is the only preventative of a long-continued price depression. Dr. Working said. Since the large crop of 1928, world acreage has increased and made conditions worse instead of better.

The economic slump is also a contributing factor in low wheat prices, the speaker declared, but unless existing stocks are disposed of, a return of prosperity will not benefit the farmer.

The appearance of Russia as a large-scale wheat exporting country reduced values still more, he said.

Next to over-production, Dr. Ferguson reported, there has been no change in the standard of living in the research area during the past three years.

Combating Tuberculosis

Effective Results Reported In Work On Indian Reserves

The lowest tuberculosis death rate ever recorded in the Qu'Appelle Indian Reserves of Saskatchewan was recorded in the Indian Health Unit here during 1933. The death rate per 1,000 Indians from this disease that obtained prior to the institution of a special project to effect reduction, Dr. R. G. Ferguson has reported to the National Research Council's Associate Committee on Tuberculosis.

Dr. Ferguson said: "The death rate among Indians in 1928 was considerably less than half the death rate among the Indians of the province as a whole. The rate is now seven and a half times that of the tuberculosis death rate of all the people in the province. When it is remembered that at the time the research was commenced in 1928, the tuberculosis death rate was twenty times that of the average of the province one appreciates the reduction that has taken place."

All types of tuberculosis determined during the year under review proved to be human diseases. Tuberculosis of the lungs was principally eliminated in 1929 by increasing the Health Unit in a restricted area under the Dominion Department of Agriculture Health of Animals branch and it is not anticipated that bovine strains will be found in future. This phase of the research is now completed.

In spite of the depression, Dr. Ferguson reported, there has been no change in the standard of living in the research area during the past three years.

Exhibit Was Invaluable

Treasures Gathered To Raise Funds For English Hospitals Were Carefully Guarded

Mr. C. L. Alberg, of Stamford, Ontario, who spoke on the matter, said guard during the recent exhibition in London, England, of treasures which had been garnered from museums and private collectors in America, England and France. The relics had been gathered by Sir Philip Sassoon, Royal Northern Hospital Trustee, and the collection was in his home.

Expert's declaration that it would be impossible to estimate the colossal value of the collection. There were scores of personal relics relating vivid episodes. Among them were a bureau made for Louis XVI in Paris, a chair made for Louis XVIII in Paris, which belonged to Louis XVI, a pair of blue chintz canes which were owned by the tragic Marie Antoinette, a silver gift coffee service, and a Sevres breakfast service bearing the arms of Madame du Barry, and a red leather dispatch case, once owned by Madame Pompadour.

Starting Hazardous Trip

Medical Students Explaining James Eastman's Death

Alma Craig, Vancouver, and Paul Feris of Port Rowan, Ont., medical students at the University of Toronto, have started without guides or other assistance, an exploration of the semi-sharpened territory between the height of land and the Albany River, east of Fort Albany.

From Nakina, a 22-foot canoe loaded with enough supplies to last several months, they plan to set forth through a series of lakes and rivers toward the long, tortuous reaches of the onomously named Drowning River.

They expect to stay at Fort Albany,

the students hope to proceed southward to the east coast of James Bay to Moose Factory and thence to Moose, northerly terminus of the Temiskaming and Northern Ontario Railway.

No Bonus

Donald Made That Newspapers Receive Government Bonus

Mr. E. Nichols, president of the Canadian Press, has issued a flat denial of the rumor statement by Dr. Howard Melgian, editor of the *Montreal Star*, in the paper's column.

Mr. Nichols said that the news papers in Canada are housed out of the public treasury to the tune of \$6,000,000 a year. Mr. Melgian's statement was made in the cents during a discussion on newspaper postal rates.

The Canadian daily newspapers are the recipients of no government bonuses, subsidies or any other kind of government favors," said Mr. Nichols, who is also managing director of the Winnipeg Tribune, in the course of his presidential address to the annual general meeting of the Canadian Press.

He added that only the exceptional publisher makes a profit on distribution of daily papers to readers by mail.

Automobiles are replacing pack animals and horse-drawn vehicles in Persia, where there are now 16,000 miles of motor roads.

The world's hardest metal, osmiridium, which is used for tipping fountain pen nibs, is found in Tasmania.

Summer lake excursion rates in Britain have been reduced to two cents a mile.

SOURCED ON THE WORLD—THAT'S LIVER

Wake up Your Liver Bills—No Calomel necessary

Many people who feel sick, dizzy and generally weak make the mistake of taking calomel, which is a strong purgative and sweating pan or enema which only worsens the condition.

What you need to do is to drink a few pounds of liquid hills into your bowel. Calomel is a laxative and causes constipation.

Calomel Pills will soon see you up. Party Vegetable Bills, Sarsaparilla.

It is all drugged.

Could Not Blame Him
Small Boy Wanted Man's Hair Cut And Got It

With the help of police, "Bulky" Young, seven, of Chicago, got his hair cut all right.

He disappeared after his mother, Mrs. Louis Young, took him to a shop where she has her own beauty salon, and was found some time later by a policeman looking in the window of another hair shop.

"I didn't," said the boy, "want to have my hair cut in any woman's barber shop."

As one man to another, the police man fixed him up by giving him the money for the haircut. Then he notified his mother.

No Men Employed

Public Accountants Firm In London Composed Entirely Of Women

"Honorsham and Co. Public Accountants," of London, England, is composed entirely of women and will not employ a man. Most of the firm's work is for utility companies.

Miss M. M. Honorsham founded it and Miss E. G. Honorsham, the public auditor, Miss Cindy Constan, aged 23, is the member and the youngest woman holder of the Society of Incorporated Accountants Certificate of Merit.

Vegetable oils tanks are being built in Vancouver harbor to provide facilities for unloading oils brought from the Orient and South Seas.

New Rainproof Fabric

Almost As Light As Silk and Resists Heaviest Weather

A rainproof material possessed of remarkable qualities has been discovered in Lancashire. The new material, which is made up into hats, coats and gowns, is between the ordinary waterproof material and the waterproofed goods.

It is capable of resisting the heaviest weather; it is very light and has a silk finish. Although it can be made almost as light as silk, it has the advantage of being less susceptible to tearing than the ordinary light waterproof.

What is there of remembrance that could bring

To me, a pang for pleasure not to

Or cast its shadow on this arm

Spring,

That in the glowing hue of field and tree,

What is there to regret or leave where

Is very light and has a silk finish.

Although it can be made almost as

Spring,

SIR JAMES CRICHTON-BROWNE,
PRE-EMINENT IN THE BRITISH
MEDICAL WORLD DECLARES—

"Beer--our national beverage--is the most truly nourishing of all alcoholic drinks and its use in moderation is well calculated to decrease susceptibility to fatigue and the headaches and despondency of those who are overwrought and worried. Beer is not only readily assimilable food but it promotes the assimilation of other foods."

MacCallum & Smith
GLEICHEN, ALBERTA

The Gleichen Flour Mill

Owing to the advancing price of wheat the price of flour has advanced accordingly. There is, however, still a big difference in the price of flour milled at the Gleichen Mill and the flour milled elsewhere and shipped in.

Four bushels of No. 2 Milled wheat will buy a 50 lb sack of flour at the Gleichen Mill will now pay for a 98 lb milled sack of Beau Ideal Flour and 10 pounds of wheatmeal.

UNITED CHURCH

Rev. V. M. Gilbert, Minister

10 a.m. worship.

11:00 a.m. Church School

GRANT HALL, senior vice-president Canadian Pacific Railways, came back from three weeks' inspection trip that took him "to the Pacific Coast states and a great many of the smaller cities of the continent." He met an caravan of 10 families slowly trudging their way to the Peace Arch border, from Shoshone, Wash., and informed them they did not have a cent in cash among the whole bunch, depending on berries for grub along the way, and fed the horses on the highway as they stopped. They were enthusiastic and hoped to make their strike just the same.

Parm management through the Canadian Pacific Railways' practical and theoretical knowledge of farm products in a number of countries, T. C. P. Hooper, manager Canada Colonization Association, told the Association on his return after a tour of the United States, where it now has 14 zone managers with 1,344 farms of a total of 467,000 acres under cultivation.

More than 350 executives from 34 countries attended the fifth meeting of the Pacific Science Conference opened at the Empress Hotel, Victoria, June 11, continuing at the Yunnanze Hotel, Vancouver, until Tuesday. It was met on the American side of the Pacific Ocean. Lord Beaverbrook, Canadian High Commissioner in England, his speech being carried by radio phone to Vancouver.

Chi Flory: "Are the bit biting?"

Al Whiting: "I don't know. If they are biting each other."

From birth a boy can own property; at 7 he is, if intelligible, answerable for crime; at 10, he if necessary, could claim his guardians; at 15 he is entitled to a vote; at 18 he is entitled to a driver's license; at 21 he is qualified for military service; at 21 he may declare himself independent of his father; and is old enough to work, work on roads and be used for breach of promises.

Town & District

The town irrigation system is certainly saving the gardens. If it were not for the water every garden in town would look like a sun baked desert instead of a place of beauty.

Mr. A. R. Yates has some beautiful big strawberries in his garden. In flavor, beauty and size none of the imported varieties, this year, could compare with them. All of which goes to prove that irrigation can do.

Hugh Hamar, son of Mr. and Mrs. H. Hamar is at present in the High River hospital seriously ill after an operation. Many friends here will be pleased to learn that he is holding up well. Mr. and Mrs. H. Hamar, speaking of his says: "Mr. Hugh Hamar of the Royal Bank staff was admitted to hospital on Monday evening suffering from appendicitis. He was operated on immediately and though the operation was successful, he is now progressing favorably. This is a great relief to folks round town, who consider that Hugh has brought his business of draft peddling to a high diplomatic art. Despite his calling, they like to have him around."

Mr. and Mrs. C. W. Halstead and family have moved to the brick residence they recently purchased from J. Christensen, located near the home of W. H. James, and until recently occupied by Mr. and Mrs. E. J. Garland and family.

The many friends of P. Kelly will be pleased to learn that he is recovering very nicely from the badly fractured leg he sustained while cranking a car some three weeks ago.

Wm. Abberhart will lecture on the Douglas System of Credit in the Gleichen Community Hall, Friday July 26th, at 8 p.m.

Vis Hickworth was called to Illness in his family. He has since returned.

Mr. and Mrs. E. J. Garland have moved into the D. Hutchison house.

The man is a rarity these days of whom it can be said "there are no ties of blood for them." A man of twenty years of carbolic acid evaporation from a shovel, says an exchange, will banish them from a room quicker than all the sticky fly-paper in existence.

Mrs. J. Moes and children left last week for Vegreville, where they will in future reside. Before leaving the Midget hockey team entertained Hobey at a party when a pleasant evening was spent playing games and dancing. The highlight of the evening was served. Miltop Desjardins the manager, presented Bob with a lovely leather belt on behalf of the team.

Bob, Hobey and his mother wish to thank Mr. and Mrs. Lester and the Midget hockey team for putting on a farewell party for Bob, in which all the boys were present.

Mr. J. Henry has purchased from the town three lots adjoining W. Read's residence and is at present busy excavating a cellar. As soon as the basement is ready he will move his residence on the property. Meantime J. E. Ostrander has purchased the lot next to Mr. Flory will vacate, and as this lot adjoins his property it will give lots of room for a garage.

J. Christensen, has been on a motor trip to the Pacific and is very much impressed with the country and states the circus along the highway in the north country are simply wonderful. He met an caravan of 10 families slowly trudging their way to the Peace Arch border, from Shoshone, Wash., and informed them they did not have a cent in cash among the whole bunch, depending on berries for grub along the way, and fed the horses on the highway as they stopped. They were enthusiastic and hoped to make their strike just the same.

"How savageously that cow looks at me," said a young woman, a visitor to a nearby farm. "It's your red paramour," he answered. "Dear madam," she exclaimed, "I knew it was a little out of fashion, but I did not suppose a country cow would notice it."

Chi Flory: "Are the bit biting?" Al Whiting: "I don't know. If they are biting each other."

From birth a boy can own property; at 7 he is, if intelligible, answerable for crime; at 10, he if necessary, could claim his guardians; at 15 he is entitled to a vote; at 18 he is entitled to a driver's license; at 21 he may declare himself independent of his father; and is old enough to work, work on roads and be used for breach of promises.

DRESSES OF TIN? NOW BEING WORN

Shades of King Arthur and his dragon knight! Modern women are wearing the dresses and don't know it. Rapidly increasing in popularity are chequered silk stockings that silk-slippering neckties for men have long been made from wood pulp, but now it comes out that the demand for low prices has inspired manufacturers to turn out a silk dress for women "so weighted with tin that it has to be sold or it will go to pieces." Weighting is a common practice in order to make a small amount of silk look heavy and feel rich. But it may be more tin than silk; the fibre drinks it in, in the dye bath, until it may carry 200 percent of its original weight in tin. A heavily weighted silk slipper is a thing of beauty, but the silk is discolored off and a thin rim remains, apparently in perfect form, but it soon goes to pieces. If it were pure silk it would curling up in a gummy residue, but the ash alone would remain and not the semblance of solidity.
